CHAPTER IV

Elucidate the primary characteristics of Classical AI.

Examine the advantages and drawbacks of Classical AI.

Elucidate the function of symbolic representation in Classical AI.

Contrast Classical Artificial Intelligence with Machine Learning.

Elucidate the contributions of John McCarthy to Classical Artificial Intelligence.

Elucidate the significance of the Dartmouth Conference in the evolution of Classical AI.

Examine the connection between Classical AI and the concepts proposed by Alan Turing.

Can machines truly demonstrate disembodied intelligence?

Is human cognition completely independent of the body?

What are the benefits and drawbacks of the concept of disembodied intelligence?

How does neuroscience challenge the notion of disembodied intelligence?
